SUMMARY

Software Developer skilled in Java and Spring Boot, experienced in building scalable applications, desktop systems, and production-ready web platforms, with a strong foundation in backend development, clean code practices, and problem-solving.

SKILLS

- **Languages:** Java, Python, SQL
- **Development:** Spring Boot, Servlet, JDBC, JPA, MySQL, SQLite, PostgreSQL, JavaFX, JSP, CSS, ReactJs (Basic)
- **DevOps & Testing:** Postman, GitHub, Maven, REST APIs, CI/CD (Bitbucket Pipelines, AWS CodeDeploy), Docker

EDUCATION

Bachelor of Technology - Computer Science & Engineering

Assam down town University • GPA: 7.34 / 10

Guwahati, India

Sep 2021 – July 2025

EXPERIENCE

Software Engineer (Freelance → Full-time)

July 2025 - Present

Hatsynk Software Private Limited

India · Remote

- Started as a freelance developer and transitioned into a full-time Software Engineer role in Jan 2026.
- Developing backend services using Java and Spring Boot for a scalable food delivery platform.
- Designing and integrating REST APIs with Android applications for seller dashboard and order management.
- Implementing JWT authentication, restaurant management, menu management, and order tracking modules.
- Improving system reliability by debugging and optimizing backend services and API responses.

Software Engineer Intern

Nov 2024 - Dec 2024

Cybersync Technologies Private Limited

India · Remote

- Conducted backend-focused development and debugging across multiple internal modules, resolving 50+ code issues, improving overall backend stability by 28%.
- Strengthened Java backend development by writing 2,000+ lines of clean, optimized code, enhancing code efficiency and maintainability by 35%.
- Completed 10+ backend engineering modules with a 95% success rate, boosting debugging speed by 40%.
- Gained strong hands-on exposure to backend architecture, increasing readiness for enterprise-level systems by 45%.

Software Engineer Intern

July 2024 - July 2024

Indian Oil Corporation Limited

Guwahati, Assam · On-site

- Developed a machine-learning-based stock prediction tool and interactive dashboard, improving investment decision-making efficiency by 40%.
- Simplified complex stock analysis workflows by providing real-time market insights, reducing manual analysis time by 55%.
- Utilized Python, Flask, Pandas, and JavaScript to build a dynamic and data-driven visualization platform, increasing data processing accuracy by 30%.
- Contributed to financial analytics innovation by streamlining stock performance evaluation, enhancing user accessibility by 45%.

PROJECTS

Friendzon – Desktop Finance App | Spring Boot, JavaFX, SQLite, JPA, SMS API | [Link](#)

- Developed as a freelancing project for a registered private limited startup, the system manages 10,000+ finance records with 100% accurate transactions across Loan, EMI, Partner, Agent, and Payment modules.
- Engineered optimized pagination, query tuning, and export pipelines (PDF/Excel), reducing data-load time by 45% and improving report generation speed by 60% for daily finance operations.
- Implemented automated backup/restore and agent-wise audit tracking, ensuring zero data loss and increasing accountability and transparency by 70% in real-time financial workflows.

PharmaManage - Pharmacy Management System | Java, Spring Boot, JPA, MySQL, Thymeleaf | [Link](#)

- Developed a role-based pharmacy management system for Owner, Pharmacist, and Staff workflows.
- Implemented medicine inventory management, billing automation, and expiry tracking to improve pharmacy operations.
- Optimized database queries and backend processing, reducing system response time by 35%.
- Designed responsive UI dashboards for pharmacy workflows, improving operational efficiency.

EcomStore – Ecommerce Web App | Java, Servlet, JSP, JDBC, MySQL, CSS | [Link](#)

- Engineered a role-based ecommerce platform supporting Admin, Seller, and Customer workflows, handling 500+ concurrent requests with optimized servlet controllers.
- Implemented secure cart, checkout, and order tracking flows with tuned SQL queries and caching, improving page-load performance.
- Improved database performance through indexing and query optimization, reducing response time and enhancing system reliability.
