SUMMARY

Software Engineer with hands-on experience in Java, Spring Boot, Spring Security, MySQL, and AWS. Skilled in designing scalable microservices, secure RESTful APIs, and database-driven backend systems following Agile and CI/CD practices. Passionate about writing clean, maintainable code and delivering high-performance, production-ready software.

SKILLS

- **Languages:** Java, SQL, JavaScript, Python
- **Backend:** Spring Boot, Spring MVC, Spring Data JPA (Hibernate), Spring Security, REST APIs
- **Architecture & Concepts:** Microservices, RESTful Services, API/System Integration, JWT, OOP, Debugging
- **Database:** MySQL, SQLite, Database Design, Query Optimization, Indexing
- **Cloud & DevOps:** Docker, AWS (EC2, S3), CI/CD (GitHub Actions), Git, GitHub
- **Tools & Technologies:** Maven, Postman, JIRA, Agile/Scrum

EXPERIENCE

Associate Software Engineer

Feb 2026 – Present

Hatsynk Software Private Limited

India · Remote.

- Engineered scalable Java and Spring Boot microservices for restaurant and order management platforms, implementing secure business workflows with Spring Security and JWT, optimizing service-layer logic, and supporting Android applications through reliable RESTful APIs and MySQL-backed operations.
- Diagnosed and resolved recurring API, database, and application-level issues through systematic log analysis, debugging, and root cause investigation, strengthening backend reliability and reducing production defects.
- Designed, developed & tested 20+ RESTful APIs (Postman) for authentication, restaurant, menu, seller dashboard & order management modules, enabling secure integration between Android clients and backend services and improving system maintainability.
- Optimized backend processing, SQL queries, and business workflows using Spring Data JPA to enhance application performance, improve data consistency, and support scalable service operations across multiple functional modules.
- Collaborated with cross-functional teams using Git, GitHub Actions CI/CD, and Agile/Scrum methodologies to deliver production-ready features, participate in code reviews, and ensure high-quality software releases.

Software Engineer Intern

June 2024 - July 2024

Indian Oil Corporation Limited

Guwahati, Assam · On-site

- Built an ML-powered stock market analysis dashboard using Python, Flask, Pandas, and JavaScript to simplify investment analysis and track real-time market trends.
- Automated data processing workflows and optimized analytics pipelines using Python and Pandas, significantly reducing manual effort while improving accuracy and reporting turnaround time.
- Produced technical documentation, project reports, and knowledge-transfer materials to support future maintenance and stakeholder communication.

PROJECTS

Friendzon – Finance Management System | Spring Boot, JavaFX, SQLite, JPA, SMS API | [Link](#)

- Built a finance management platform using Spring Boot, JavaFX, JPA, and SQLite to manage loan, EMI, partner, agent, and payment workflows, including automated EMI scheduling and repayment tracking.
- Designed secure, role-based authentication and transaction workflows with Spring Security and JWT, strengthening access control across partner and agent roles while safeguarding sensitive financial data through encrypted credential storage, secure token validation, and session management best practices.
- Optimized database queries and indexing strategies to improve application performance, scalability, and retrieval speed under load.
- Added backup, restore, and audit-log tracking capabilities to enhance data reliability, recovery, and operational accountability.

PharmaManage - Pharmacy Management System | Java, Spring Boot, JPA, MySQL, Thymeleaf | [Link](#)

- Created a role-based pharmacy management system supporting inventory, billing, and expiry tracking for multiple user roles.
- Enhanced backend performance through optimized MySQL database queries, JPA entity mapping, and efficient service-layer processing.
- Delivered responsive dashboards and deployed backend services on AWS EC2 with S3 integration, following Git-based collaborative development practices.
- Strengthened application reliability by debugging backend services and refining database-driven workflows.

EDUCATION

Bachelor of Technology - Computer Science & Engineering

Assam down town University, Guwahati

Guwahati, India

Sep 2021 - June 2025
