SUMMARY

Java/Cloud Engineer with 1+ year of experience developing enterprise applications using Java, Spring Boot, Microservices, REST APIs, Cloud Technologies, Docker, CI/CD, SQL Databases, and Agile/Scrum methodologies. Experienced in building scalable backend systems, API integrations, cloud-ready deployments, infrastructure automation, secure authentication, and production support across the SDLC.

SKILLS

Languages: Java (Primary), Python, SQL

Frameworks: Spring Boot, Spring Security, JPA/Hibernate, JDBC, Servlet, JSP, JavaFX, ReactJS (Basic), Thymeleaf

Backend & APIs: REST APIs, Microservices, JWT Authentication, Dependency Injection, IoC, Transaction Management

Databases: MySQL, PostgreSQL, SQLite, JPA,

DevOps & Tools: AWS (EC2, S3), Docker, CI/CD, GitHub Actions, Maven, Git, Monitoring & Logging

WORK EXPERIENCE

Software Engineer

Hatsynk Software Private Limited

Feb 2026 – Present

India · Remote

- Joined Hatsynk as a freelance developer and later transitioned to a full-time Software Engineer role based on performance and project contributions.
- Developed and maintained 5+ cloud-ready microservices using Java, Spring Boot, REST APIs, Docker, and SQL databases in Agile environments.
- Constructed RESTful APIs and backend services supporting high-availability enterprise applications and distributed systems.
- Authored optimized SQL queries and functions, improving backend data operation performance by 20% across order and transaction modules.
- Configured JWT authentication and order tracking modules using IoC and JPA transaction management; defect-resolution across 4 release cycles achieved zero production failures.
- Collaborated with cross-functional teams to support application deployment, monitoring, troubleshooting, and production issue resolution.

Software Engineer Intern

Indian Oil Corporation Limited

June 2024 – July 2024

Guwahati, Assam · On-site

- Built a Python/Flask ML stock prediction tool and interactive dashboard across 5 market datasets, improving investment decision-making efficiency by 40%.
- Engineered real-time stock analysis workflows (Pandas, JavaScript) reducing manual analysis time by 55% and raising data processing accuracy by 30%.
- Delivered 2 knowledge transfer reports and technical specifications to 8 cross-functional stakeholders, meeting all Agile SDLC documentation requirements.

PROJECTS

Friendzon – Desktop Finance App | Spring Boot, JavaFX, SQLite, JPA, SMS API

- Shipped a production finance platform for a registered startup; manages 10,000+ records with 100% transaction accuracy across 5 modules: Loan, EMI, Partner, Agent, and Payments.
- Applied JPA query tuning and pagination for PDF/Excel export pipelines — reducing data-load time by 45% and improving report generation speed by 60%.
- Integrated automated backup/restore and audit tracking, eliminating data loss events and raising workflow accountability scores by 70%.

PharmaManage – Pharmacy Management System | Java, Spring Boot, JPA, MySQL, Thymeleaf

- Launched a role-based pharmacy platform (Owner, Pharmacist, Staff) covering 500+ SKUs with inventory tracking, billing automation, and expiry alerts.
- Optimized 10+ database queries and backend processing logic, reducing system response time by 35% and cutting average page load by 40%.
- Designed Thymeleaf/JSP UI dashboards for 3 user roles, covering the full JEE stack from data-access layer to front-end presentation layer.

EDUCATION

Bachelor of Technology – Computer Science & Engineering

Assam Downtown University • GPA: 7.34 / 10

September 2021 – July 2025

Guwahati, India
